

## ***DZ-500-2S Double Chamber Vacuum Packaging Machine***

Double chamber vacuum sealer is an ideal solution for companies who want to boost their packaging operations without sacrificing floor space. With four sealing bars and two sealing chambers, this product will quickly package small, medium and large size products and immensely increase shipping efficiency in shorter time.

DZ-500 features 304 stainless steel construction with two 20-inch seal bar located in each chamber provides the option of sealing four large chamber pouches at once or doubling up of smaller bags for maximum efficiency. A powerful commercial-grade, 1.55 hp oil pump delivers a quick and quality vacuum in 20-30 seconds. Smooth-rolling caster wheels allow the Utien DZ-500/2S Double Chamber Vacuum Sealer to be moved easily for cleaning or maintenance.

High efficiency vacuum packing can be carried out through two chambers. Utien double chamber vacuum packaging machine has two vacuum chambers which can work in turn. When the product is packaged in the first chamber, the second chamber can unload the packaged product and put on the unpacked product again. In this way, the double chamber vacuum packaging machine can achieve high efficiency packaging process comparing to Single Chamber Vacuum Packaging Machine.

It's easy for you to set the vacuum, seal, and cool time through control panel. Bag locks on the seal bar gasket reduce bag movement during busy production cycles. The Utien double chamber vacuum packaging machine is perfect for small-medium volume processors needing to package large size products like meat, sauce, flavoring, dry fruits and bean products. It's also a solution for large catering companies and hotels that need to package large quantities of food for events.

This machine is mainly suitable for products that require vacuum packaging in the food industry, meat, grains, soy products, snack foods, preserved fruits, pickled products, medicinal particles, solids, etc., and can prevent oxidation, mildew, rot, and moisture to extend the storage or preservation period of the product.

### Specifications

| Model          | DZ-500/2S                                  |
|----------------|--------------------------------------------|
| Sealing Length | 500mm×2                                    |
| Sealing Width  | 10mm                                       |
| Maximum Vacuum | ≤-0.1MPa                                   |
| Voltage        | 380V / 50Hz                                |
| Power          | 2.3kW                                      |
| Chamber        | 500mm×420mm×95mm (19.7" x 16.5" x 3.7")    |
| Dimensions     | 1250mm×760mm×950mm (49.2" x 29.9" x 37.4") |
| Weight         | 220kg                                      |
