

Automatic Horizontal Labeling Machine for Bottle or Box GF-LM-M6

Features:

1. This machine is applied to cosmetics, electronics, food, medicine, stationery etc. in top labeling.
2. The labeling head adopts famous high precise servo motor, controls to convey the labels and ensures the labeling accuracy.
3. The controlling system adopts SIMEMS and famous panel, The human interface can be operated in Chinese and English. Operation is simple and easy to learn.
4. The separated clutch makes the strain more balanced, it can ensure accurate labeling.
5. Super high power AC motor and frequency inverter, helps to improve the accuracy of labeling.
6. The machine structure adopts enhanced rigidity designed, make the machine own a simple, elegant and stable appearance.
7. The labeling head can be adjusted at eight orientations, the labeling head can be inclined easily.
8. The conveyor line or special design can be added according to the labeled product.

Technical parameters:

Model	GF-LM-M6
Production speed	60m/min
Labeling accuracy	±1mm
Label outer diameter	Φ330mm
Label inner diameter	Φ76.2mm
Bottle diameter	30-200mm
Label max width	200mm
Power	380/220V 50Hz 1500W
Outline Size (L*W*H)	2000*800*1400mm
Weight	150kg
