Automatic Jelly bar Packaging Machine 320C1-F

Product information:

1. The jelly bar packaging machine adopts the most advanced micro computer chip to control. Coordinate with the photoelectric tracking monitoring, it can cut accurately between two bags. it is easy to operate. The high precision motor can ensure the accuracy of cutting. Perfect sealing with the special sealing system.
2. Suitable for packing the liquid material the for the composite membrane jelly roll, ice pops, etc. It can be packed into drum shape.

Technical parameters:

Model	320C1-F
Packing speed	20-60 bags/min
Bag length	30-280mm
Bag width	25-145mm can adjust
Measuring capacity	L1:3-15ml, L2: 10-60ml
Powder	1.8 kw
Weight	250 kg
size	650 * 850 * 1850 mm
Packing type:	back sealing
