

2/4/5/6/8/10/12 Lanes Packaging Machines

Applications:

1. Suitable to pack strip & rod-like bags;
2. Packing different products, it can equip with different filling systems. It is much suitable to pack graduals & liquid product;
3. Granules packing type of machine combines of different kinds of special filling systems, like spiel, cup-pusher, swinging head, ect.
4. Liquid & creamy products packing machine can be equipped with piston pump, magnetic pump or gear pump for your choice.
5. Pack film requires complex film.

Features:

1. Blended with advantaged design, our machines can achieve high accuracy, fast speed and high efficiency;
2. Employed Japanese brand–Mitsubishi PLC controlling system, it possesses the special functions of production volume counting and self-diagnosis;
3. It adopted clear Wenview touch screen and more easy-to-operating system;
4. The machine will automatically stop when there is no film to avoid film wasting;
5. It makes sure that bag can be smoothly and rapidly pulled on account of adopting heat sealing system matching up with accurate bag-length cutting chasing function by photocell;
6. Adopting Japanese brand Omron middle relay, it has superior packing result;
7. It employs durable components with long life span on the whole, and it again upgrades durability and stability.

Specifications:

Model	Multi lanes packing machine
Number of lanes	4/5/6/8/10/12 lanes
Bag types	Rod-like stick bags
Production capacity	Pack graduals: Max40bags/min/lane
	Pack fine powder: Max20-30bags/min/lane
	Pack liquid(easy-to-flow): Max30-40bags/min/lane
Bag sizes	W16-35mm L50-140mm
Volume per bag	1-20ml
Packing film type	Heat-sealable complex film
Outer & Inner diameter of film roll	inner : 70-75mm outer : Max350mm
Power supply	220V 50Hz single phase
Air consumption	7Liters/min@0.7bar
