

AK-450A Automatic Wrapping Machine

This type of machine is suit for beverage, drinking water, beer, wine and infusion bottle ect. Packaging, which can be packed without tray and with a firm and beautiful appearance.

Advantages:

- Applying imported Siemens PLC, which can control the machine automatically, with stable performance, precise control.
- With the capacity of feeding and sorting bottles, shrinking and cooling shaping automatically.
- Inductive switch control the feeding of film, which can control the length of film and reduce the consumption.
- Imported transducer control for the convey motor, which can realize steeples speed regulation.
- Advanced Helical air circulation structure, three layer of heat insulation treatment, and energy saving.
- Strengthened cooling shaped tunnel, which can shape the package quickly and transported conveniently.
- Loading bottom plate automatically, color film wrapping and shrinking.

Technical Parameters:

External dimension	11500×1560×2600mm
Weight	5.5T
Max. packaging size	600×400×350mm
Packing speed	40-45 bags/min
Power supply	380V, 3phase, 60-70KW
Air pressure	0.6-0.8Mpa
