

DLL-160D Automatic Alu-alu Strip Packing Machine

DLL-160D automatic Alu-alu strip Packing machine is a new type one that we adopt automatic control technology and then create and design. It has the characteristics such as high technological content. novel structure. High efficiency, low noise, conveniently manipulating and mending etc.

It is suit able for packing of troche; capsule and electronic component of vocations such as pharmacy, electron and food etc. and it is also suitable for the packing of nubby objects such as candy etc. It has a good function of protecting form light and sealing. it adopts PLC control, its procedures such as filling, hot sealing, printing batch code, cutting, adjusting procedure etc. Can be randomly set. It cannot be limited by common type machine's machinery ranking gear, speed prop -option. So the work will more convenient, the speed of packing will be high, the effect of the packing will be better.

Specifications:

Capacity:	30,000-65,000 pieces/hour
Punching Frequency:	30-60 Time/min
Total Power:	220V 50Hz 2Kw
Air-compression:	0.4-0.7MPa
Air-consumption:	≥0.1m ³ / min
Weight:	450Kg
Overall Dimensions:	1200 X 850 X 1700mm
Dimensions of packing Box	1300 X 1000 X 1800mm
