

## ZHJ-200/260/400 Automatic High Speed Cartoning Machine

Automatic High Speed Cartoning Machine is suitable for packing blisters, tubes, ampoules and other related objects into boxes. It can run continuously and the highest speed can up to 370 boxes/min. It has advantages of high packing efficiency and good quality, and is hi-tech Product with structure of mechanical-electrical integration. This machine can fold leaflet, open box, insert blister into box, emboss batch number and then close or seal automatically. It adopts frequency invertors to adjust speed, human machine interface to operate. PLC to control and photoelectric to supervise and control each station. So that once something unexpected happens, it will stop and display the reasons automatically, which can solve the troubles in time.
