

Semi Automatic Plastic Soft Tube Filling and Sealing Machine MT-6

Application:

- This machine is designed specially for soft tube filling and sealing
- It is applicable to all kinds of plastic and plastic combined soft tube
- As long as the materials is not very thick, same machine can work for both plastic and plastic with aluminum and similar if combined materials is thick, need to change energy converter to achieve a good result

Spec and Feature:

- Semi Automatic 2 in 1 machine, Filling and Sealing
- Manual Feed tubes by filling tubes into holders on the plate
- Ultrasonic Sealing, PLC control, Photoelectric for detecting
- Print code and letter at the end of tube
- Touch screen human-computer interface with simple operation
- Suitable for different shaped tubes, just need to change the holders on the turning plate
- Compact models, operation stability, simple operation, easy cleaning

Workflow:

- Hand Fill tubes into holders on the turning plate
- Automatic Filling
- Automatic Sealing by Ultrasonic
- Automatic Cutting the extra
- Tubes Ejected from the Holders

Technical Parameters:

production capacity	30-1500 BPH
filling volume	5-200ml (<i>adjustable, customization is available</i>)
filling accuracy error	±1.5%
air source	>0.6Mpa
ultrasonic power rate	1.0KW
powr supply	220V 50Hz, 1.5KW
machine size	800*900*1700mm ³
