

HX-006 Plastic Tube Filling and Sealing Machine

Packry's HX-006 Plastic Tube Filling and Sealing Machine, it's the type of high-speed aluminum Plastic tube filling and sealing machine which is widely used for closing cream lotion tube cleanser moisturizing and medicine hose.

Machine Operation Process: Artificial feeding tubes → Auto Tube orientation → Auto Filling → Auto sealing → Auto producing date printing → Auto trimming → Auto tubes output

Recommended Products: Plastic tubes used in cosmetics, food, pharmaceutical, or nutraceutical industries.

Features:

- Easy to operate and maintain.
- Automatic positioning, filling, welding, cutting and trimming, printing code in one time.
- Stainless steel machine body, strong and beautiful looks,
- Sealing mould can be customized according to customer requirements. Can seal many size of tubes.
- Ultrasonic Sealing Machine power source for the pneumatic, working steady, not easy to damage, customers can rest assured use.
- Ultrasonic frequency can meet international standard, no harmful to human being or environment
- Can be work in time, not need wait the heat time.

Options:

- 304# stainless steel body
- Mitsubishi PLC control
- Heating & Mixing

- Change different filling range

Specification:

Model	HX-006
Power supply:	AC220V 50/60HZ single phase
Power	2KW
Filling Range	A:5-30ml B: 6-60ml C: 10-120ml D: 25-250ml E: 50-500ml
Filling Accuracy	±1%
Sealing Dia.	10-50mm
Max.height	10-200mm
Capacity	15-25 tubes/min
Air supply	0.6Mpa, 0.35m ² /min
Hopper	30L (Customer-made available)
HS code	8 422 303 090
Dimension	1300*900*1550mm, 320kg
Machine Body	304# stainless steel
