

BGJ-Y200 Adhesive Labeling Machine

Adhesive labeling machine consists of conveyor system and label-guide system. conveyor system can be customized and adjusted according to customer's needs. Label-guide system can label right product location when sensor check products.

Our adhesive labeling machine is widely used in food adhesive labeling, toy adhesive labeling, chemical adhesive labeling, cosmetic adhesive labeling, medical adhesive labeling and plastic adhesive labeling industries.

Features:

1. All machines are made of SUS304 stainless steel
2. It can be equipped bottle feeding table
3. It avoid many problems of labor labeling, skew labeling, bubble, wrinkle, irregular labeling etc
4. It equips electric-eye to improve the precision for cutting off the label materials.
5. It adopts equivalent PLC, positioning module, stepping motor and sensor electrical control system control.

Technical Parameter:

Model		BGJ-Y200
Labeling precision	mm	±1 (exclude the product label deviation)
Labeling speed	pcs/minute	20~200 (its up to product size)
Applicable Product Size	mm	20≤Dia.≤150
Applicable Label Size	mm	15≤W≤200, L≥20
Machine Size	mm	L2000*W900*H1500
Power	V	220, 50/60HZ
Weight	KG	150
