

PM630 Automatic Round Bottle Wrap Around Labeling Machine

Features

1. This machine is used for using the Taiwan touching type of PLC control or knob control. It is made up of photo electricity equipment of Japan OMRON. Synchronization electrical, timing electrical, conveyer belt. Import strap etc correlative part.
2. The design of mainframe part absorbed label transmit of import machine and solved the unsteady ingredient of homemade common label.
3. The machine is suitable for various specifications of bottles. Its operation is easy and it can be finished in a short time.
4. The quick printer adopts the motor drive, gas drive. The words in the ribbon are clear and clean.
5. The whole machine is designed to meet GMP standard.
6. This machine is suitable for processing the big round label of medicine, chemical, food, commodity etc.

Technical Parameter:

Item	Parameter date
Main Material	Stainless Steel 304, Aluminum Alloy 6061
Dimension	L 2100mm * W 900mm * H 1300mm
Voltage	220V/50Hz
Power	1200 W
Production Capacity	4000-6000BPH (High speed can be customized)
Labeling Accuracy	+/- 1mm beak edge
Label Roll Core	76 mm or 3 Inches
Label Roll Diameter	350 mm
Label Width	10~110 mm (special size can be customized)
Label Length	20~360 mm (special size can be customized)
Bottle Diameter	30~90 mm (special size can be customized)
Bottle Height	30~200 mm (special size can be customized)
