

JL-300II Softgel Machine

The biggest softgel encapsulation system for large-scale production.

Softgel gelatin machine is our main machine. It is also the main machine for making different type softgel capsules. The quality of softgel capsules products are main based on the qualify machine. Good machine will have good product.

One set main machine will mainly include gelatin ribbon maker, injection pump and encapsulation parts. Based on more than 15 years machine making experience, we know how to make a good machine also combined with advanced technology.

Capacity:

Technical Specification	JLH-300II
Output	287640/h(8#OV; 6rpm)
Die Roll Size	Φ200×300mm
Die Roll Speed	0-8rpm
Plunger	20 sets, 24sets and 34 sets available
Feeding Range	0-2mL
Feeding Variance	±1.5%
Overall Size	2200*1000*1900
Overall Weight	1800Kg
Total Power	15kw
Points	Some Modification is available based on your specific requirement.
	Automatic thickness control; Automatic die alignment; Automatic injection time
