

BFYG Essential Oil Filling Line

This machine is suitable for needle-insert filling in the opening diameter of bottle less than 1.8mm. Pison pump filling system to fill precise. This machine can auto finish bottle orienting, filling, cap adding, cap screwing and out feeding, It is special design in vacuuming to accumulate the rudimental oil attached outside surface of filling nozzle, acoid the oil. Overflowing onto the surface of bottle to hard label, Fully meet to the requirements of GMP.

Main Technical Parameter:

- Filling voLrme: 2 - 20 ml
- Filling error: $\leq \pm 2\%$
- Production capacity: 30-40 bottles/min (single head filling), 60-80 bottlesos/min (multi-heads filling)
- Yield of capping: $\geq 99\%$
- Power source: 220V 50Hz
- Power output: 1Kw
- Weight: 500 kg
- Overall dimension: 1800x850x1600(mm)
