

3D Auto Cellophane Wrapping Machine with Tear Tape

The three-dimensional packaging machine 3D WRAPPING MACHINE is designed for the packaging of cigarette boxes. It has a full set of functions of automatic feeding, stacking, packaging, heat sealing, sorting, and counting, and can realize single or multiple integrated packaging of boxed products.

1. Three-dimensional packaging machine (tobacco packing machine) adopts wrapping, folding, and sealing packaging form, compact structure and beautiful;
2. Using frequency conversion stepless speed regulation control system, touch screen and PLC control system, the man-machine interface display is clearer, and the maintenance is easier;
3. It adopts automatic material sorting and conveying tailstock, which is convenient to connect with the automatic production line, which saves labor costs more obviously.

Technical Parameters:

Packing speed	10-20 boxes/min
Packing material	BOPP film and tear tape
Packing size	Length:60-400mm Width:20-240mm Height:10-120mm
Machinery size	1800×800×1220
Machinery weight	185kg
Total power	4kw
