

JW-VP73 Automatic Vertical Pouch Packing Machine

The JW-VP73 vertical packaging machine adopts Siemens PLC's full computer control system, man-machine interface, and large touch screen for easy operation. Adopt servo film transport system, horizontal sealing, vertical sealing, pneumatic control, accurate positioning, excellent performance of the whole machine, perfect automatic alarm protection function, reducing loss to a minimum, the high-speed automatic metering device can automatically complete the weighing, The whole process of feeding, bag making, filling, date printing, counting, and finished product output.

Technical Parameters:

Items	Content
Capacity	600-1800bag/hour (it will be affected by film material, packing weight and bag length, and so on)
Accuracy	* $\leq \pm 1\%$, depending on the measuring equipment & materials
Bag Size	Length 120-450mm
	Width 140-350mm
Film Pulling Belt	Double-belt pulling film
Bag type	Pillow Bag, punching bag
Reel film width	Max. 730mm; Inner roller hole: $\phi 75\text{mm}$
Thickness of film	0.04-0.13mm
Air consumption	0.8Mpa 0.3cmb/min
Main power/voltage	6KW/ 380V 50Hz
Dimension	3350*2250*2800mm
Net Weight	2500 KG
Packing Volume	1-5kg
