

## *Automatic Desiccant Inserting Machine*

The Automatic Desiccant Inserting Machine has strong compatibility, suitable for all kinds of specifications, all kinds of round, oval, square, flat, square bottles.

### **Features**

- The Automatic Desiccant Inserting Machine has precise, reliable and durable cutting edge, high shear does not cut off the drying bag
- The Automatic Desiccant Inserting Machine does not work when there is no bottle, fault self-test, dry bag into the bottle and other monitoring and alarm control functions to ensure the continuity of equipment operation and the accuracy of the desiccant bag
- The Automatic Desiccant Inserting Machine can be fully automatic, up and down, intelligently coordinated, personnel needs, and the process of saving humanity.
- Taiwan photoelectric sensor production, stable and durable

### **Technical Parameters:**

Applicable bottle type	round, oval, square, flat square bottles
Desiccant bag	disk desiccant bag, size according to the bottle size
Production capacity	50~120 bottles per minute
Power supply	AC220V 50Hz 0.5kw
Air pressure	0.6Mpa
Overall dimension	1600×750×1780mm
Weight	180kg
