

Pharmaceutical Box Bundling Machine WK-50

Worth-IT banding machine allow for safe, reliable bundling, palletizing, and carton closing in pharmaceutical applications that prevent package tampering and losses. It is not only applicable to pharmaceutical, also used in cosmetics, food and so on.

Feature

- PLC controls the servo motor and a series of cylinders to complete automatic binding, which is fast and nondestructive to the packaging.
- Unique sealing technology ensures that the finished strip is firm and can withstand 15KGS tensile strength without fracture.
- Flexible binding technology is adopted, and the tightening force is automatically adjusted according to the box to ensure proper tightness without damaging the box.
- The electrical part adopts world-famous brands with stable and reliable performance.
- Using OPP and BOPP with non deformable characteristics, the cost of packaging materials is low.
- It can be designed to connect with cartoning equipment and packing equipment into a complete automatic line

Specification

Item	WK-50
Band width	48mm
Band material	OPP film / BOPP film
Band size	Max. 400*300*200mm Min. 40*30*10mm
Band speed	Max. 25 pcs/min
Machine work height	720~820mm
Power supply	AC 220V 50Hz 0.5KW support customized
Air supply	0.4~0.6Mpa
Dimension	2100*800*1100mm
Weight	100KG
