

Automatic Rotary Type Glass Bottle Capping Machine MTCP-100

Application

- MTCP-100 automatic plastic bottle screw capping machine is our new designed product recently.
- Automatic capping machine adopts rotary plate to positioning the bottle and capping.
- The type machine is widely used in packaging cosmetic, chemical, foods, pharmaceutical, pesticides industry and so on.
- The bottle capping machine adopts Frequency controlled drive, and transportation exit is adjustable, so it could meet different packaging machinery pipeline request.
- It uses PLC programmable control. Structure compact, just used similar size of bottles and caps.

Features

- Automatic Feeding with Feeding Plate or Vibration bowl and Feeding Track
- Automatic Capping for all kinds of caps, such as lug/twits off caps, plastic screw caps and so on
- We can also design machine according to customer's special requirements.

Technical Parameters

Speed	1500-3000 bph (customizable)
Capping accuracy	>99%
Caps applicable	Screw caps or press caps
Caps' diameter range	20-80mm (can be customized)
Power supply	220V 50hz 1kw
Air supply	0.6MPa
Bottle applicable	a wide shape range
Caps feeding device	Lifter or vibration bowl
Feature	PLC, touch screen, with clutch
