

CapperPacks Cap Sorting Elevator

The CapperPacks Cap Sorting Elevator is suitable for threaded round caps. Manually pour the caps into the bucket of the cap elevator, and the machine automatically sorts and lifts the caps. The caps are moved from the slide rail to the cap hanger. With the cap rubbing machine, there is no need for spare parts when replacing the caps, and only need to operate the hand wheel to adjust slightly to meet production requirements.

Technical Parameter

- Suitable for threaded cap diameter | 20-150mm
- Production capacity | 50-80PC/min
- Total power | 0.37KW
- Dimension (L*W*H) | 1200×1850×3050mm
- Machine weight | 160KG
- Power supply | AC220/380V 50-60Hz
