

Automatic High Speed Sticker Labeling Machine

High Speed Sticker Labeling Machine Is N.K Industries Solution For Labeling At Relatively Higher Speed In Industries Like Pharmaceutical, Food, and Pesticide Etc.

Salient Features

- A total cGMP model
- High Production Speed up to 240 containers/min depends upon the type of vial.
- S.S. 304 Constructions.
- Servo Assisted Accurate label dispensing.
- Secondary Pressing unit.
- Batch coding printing like Inkjet printing can be accommodating.
- Automatic label length detection.

Machine Working

- NKSAL -240, a High Speed Sticker Labeling machine is used for labelling of round container which is previously filled and sealed.
- No change parts are required for change over of container size.
- Machine conveyor will receive container from in feed turntable, it will be separated by the feeding roller assembly to maintain the pre determined space between the two containers according to the label length and container diameter.
- Label is placed on the container immediately when it will be sensed by the container sensor, it ensures instant adhesive of label's edge. Then it passes through the pressing unit resulting in precise registration and crease-free application.

Technical Specifications

Speed	Up to 240 Vials / min.
Electrical Supply	2 HP
Power Requirement	230 Volts, Single Phase, 50 Hz
Height of Conveyor	Adjustable from 800 to 850 mm
Dimension	2000 mm (L) x 1-00 mm (W) x 1250 mm (H)
Weight	500 Kgs (Approx.)
Gross Weight	600 Kgs (Approx.)
