

XT-620 Series of Eye Drops Plug-putting, Cap-screwing and Filling Machines

Applicable for filling round or unmoral shape bottles with capacity of 2-30 ml, such as eye drops, naristillae and auristillae or liquid split charging in scientific experiments, composition test and other fields.

Filling, putting inner plug, putting outer cap and screwing cap are performed with the use of high accuracy cam mechanism.

It is operated with touch screen; production speed can be set with programmer. Filling accuracy is high and packing volumes can be adjusted conveniently with the use of imported peristaltic pump or ceramic pump. It has functions of non-filling with no bottles and automatic elimination. Good safety barrier property; scientific design; impact structure; easy to operate.

Technical parameters

Applicable specifications	2-30ml
Speed	80-120 bottles/min.
Air consumption	1m ³ /h 0.3-0.4 kg/m ²
Net weight	650 kg
Power supply and total power	220V 50HZ 2KW
Boundary dimension	2100mm×1350mm×1730mm
