

DPB-350V Blister Packing Machine

This machine is suitable for automatic high speed alu pvc packing of capsules, tablets and other regular shape medicine. It adopts flat pressure forming to form strong and average blisters, and roller type mesh sealing to ensure reliable sealing. The machine is equipped with batching system, embossing device and horizontal boundless punching to achieve high automation and efficiency.

Main features:

1. Fast mould change, push-oriented, without using tools
2. Adopt servo traction, simple to set up, convenient to debug
3. Push-oriented punch mould installation. If inspection and reject system is equipped and changed, no need to dismantle suck discs
4. Long distance between two heating plates of forming when machine stops, to avoid PVC to be excessively heated and softened.

Main Technical Parameter

Punch Frequency	20-25次/分
Forming area	200×330(mm ²) (Max.)
Forming depth	26 mm (Max.)
Traction stroke	60-210mm
Blister specification	Standard : 100×150、150×200、 (customized allowed)
Packing material	Standard PVC hard pieces : 0.35-0.5×350 mm Standard PTPAluminum foil : 0.02-0.035×350 mm Average hole diameter of roll : 70-76 mm Max. width: 350mm
Total power	about16KW
Main motor power	Y90L-4 or 2.2KW
Overall dimension	5100×850×1760 mm (L×W×H)
Weight	3000Kg
