

## Rotary Capping Machine FX-6B

The rotary capping machine can implement positioning and placing threaded caps precisely. This bottle capping machine can prevent bottles and caps from damage during the capping process, so as to ensure high work efficiency. It also has automatic nitrogen injection and cap removal functions, and features stable operation, low noise, long service life and wide range of applications. Besides, capping speed is adjustable, this makes the rotary capper suitable for large and medium-sized packaging workshops.

### Parameters:

Model	FX-6B
Capacity speed	3000-6000BPH
Suitable cap height	10mm---35mm,
Suitable cap Diameter	diameter: $\Phi$ 20mm--- $\Phi$ 80mm
Suitable specification of bottle	diameter $\Phi$ 40mm--- $\Phi$ 100mm, height 80mm---280mm
Power supply:	AC 380Vthree phase; 50Hz
Power	3kw
Capping Heads	6
Specification	2000*1300*2200mm
