

RL6/8-200 Bag Packing Machine

Features:

- Stainless steel appearance, beautiful equipment, high-end, stable operation;
- Instead of the manual packaging, improve the production efficiency, significantly reducing the cost of production;
- Using PLC control, touch screen operation, the use of a wide range, and according to the needs of production capacity, set the speed;
- Quick replacement of the bag specifications, you can adjust the handle quickly and easily adjust;
- Automatic detection function, if not open the bag or open the bag is not complete, no feeding, no heat sealing, the bag can be reused, do not waste packaging materials and raw materials;
- Can be applied to self-reliance bags, handbags, zipper bags, four-side sealed bags, three side sealed bags, paper bags, M-type bags and other composite bags;
- Can automatically complete the bag, date printing, and open the bag, feed, sealing, finished product output function;
- Can be combined with the long computer combination scale, screw scale, filling machine, screw hoist, Z-type hoist and other online operation;
- Using oil-free vacuum pump, to avoid pollution of the production environment.

use:

Applicable to candy, nuts, raisins, peanuts, melon seeds, nuts, potato chips, chocolate, biscuits and other large particles and other irregular lumps packaging.

Model	RL6/8-200
Packaging speed	20~55 bags/min
Packing specifications	W : 70-200mm

	L : 100-300mm
Compressed air usage	$\geq 0.45\text{m}^3/\text{min}$
Power supply	380V 3Phase 50/60HZ 2.5KW
Dimensions	L1570×W1450×H1480mm
