

Semi-automatic Cuff-type Sealing and Shrinking Packaging Machine SBFX6040

1. Dual indicator light tips, effectively prevent the wrong packaging, while ensuring the safety of the operator
2. Bilateral air supply system to ensure that the seal is flawless
3. Import AC contactor, automatic temperature control
4. Imported inverter, variable speed
5. Large air volume cooling system, the product heat shrinkage after the rapid cooling stereotypes
6. The control panel operation is safe and simple
7. The feed port precise positioning, and can be adjusted
8. Furnace size can be customized according to customer needs
9. Up and down the wind system to ensure a one-time to achieve the perfect packaging effect

SBFX6040 suitable for cans, mineral water, beer, glass bottles, beverages and other bottled products without bottom care (or bottom care) heat shrink packaging; at the same time with the use of constant temperature PE shrink furnace to make the goods to the perfect packaging effect. This set of equipment using advanced German technology, the main accessories are used by various well-known brands, such as Omron, Mitsubishi, Fuji, etc .; machine performance and stability, long service life.

Model	SBFX6040
Power supply voltage	220-240V / 50-60Hz
Sealing size	L600 * W400mm
Work efficiency	3-6sets / min
Pneumatic pressure	1HP / 2KW
Sealing time	0.5-1.5S
Machine size	1150 * 910 * 1860mm
Machine weight	220kg
Model	BSP6050
Power supply voltage	3Phase 380V / 50Hz
Heating tube power	15KW
Shrinkage size	1800 * 500 * 450mm
Machine size	2450 * 740 * 1550mm
Machine weight	260kg
