## L type Shrink Packaging Machine FQL450/550

L type shrink packaging machine which uses roll-fed thermoplastic film folded in half along its length. A product or group of products are placed between the two halves of film. The film is then sealed and cut off around the product with an L shaped sealing bar. The pack is then passed through a heated tunnel to shrink the film around the product to produce a tightly enclosed pack. Widely used for wrapping books, video tapes, floppy disks, foodstuffs such as dried fish, boxed products, etc.

### Features:

1. Total enclosed packing type
2. Feeding bag-making, sealing-cutting, shrinking and packing are finished at once automatically
3. Constant temperature superfine metal alloyed sealing blade, antistickness, slight sealing, non-coking, non-smoking, unpolluted
4. The blade resiles while cutting objects
5. Adjust packing size without changing mold when changing packing objects
6. The dual hot-air cycling temperature in the shrinking chamber can be adjusted optionally.

### Specification:

MODEL	FQL450	FQL550
(V-Hz)Voltage	220/50-60Hz	220/50-60HZ
Air Pressure Required (kg/cm <sup>3</sup> )	5-7	5-7.
Power	1.35KW	1.5KW
Capacity(PCS/min)	15-30bags/min	15-30bags/min
Maximum packing size L+H(H<150mm)	<500mm	< 600mm
Maximum packing size W+H(H<150mm)	<400mm	< 500mm
Cutter size L×W(mm)	550×450	650×550
External Dinensions(L×W×H)(mm)	1650x800 x1450	1750x900x1450mm
Net weight(kg)	300kg	350kg
