

Automatic Auger Filling Vibrating Machine | VTOPS-PSH-V

Automatic auger filling vibrating machine is an updated rotary type automatic auger filler from model VTOPS-PSH-02. It is Filling-by-Vibrating auger filler developed by Vtops Machinery for high-end customers with vibrating needs during filling. The vibration force is adjustable according to the needs of the customer.

The VTOPS-PSH-V suitable fills the powders that require vibration during filling, such as: meal replacement powder, paprika chili spices powder, Supplements powder, etc.

Features:

1. Meet GMP standards with national food hygiene requirements.
2. LCD touch screen with Chinese and English double languages.
3. Filling weight is adjustable at any time. Working status is changeable at any time.
4. Filling process adopts servo motor: big torque, high precision, high speed. Motor speed is adjustable and good stability and other advantages.
5. Stirring part uses Taiwan brand maintenance-free speed-reducer: With low noise, long life, lifelong maintenance-free characteristics.
6. Totally closed and dustproof structure, the columns are food grade 304 stainless steel, the doors are transparent plexiglass with 1 cm thick. The operators are visible the status of materials from transparent plexiglass.
7. Easy clean hopper is easy to clean the hopper and replace auger part for different filling weight.

Technical Parameters:

- Filling Weight: 10g-2500g
- Filled Error: $\leq \pm 1\%$
- Measurement Method: Auger Filler
- Filling Speed: 0-30 fills/min
- Filling Motor: Servo Motor
- Indexing Control: Star-wheel
- Plexiglass Room: Yes
- Auger Height Adjustable: Yes
- Monitorable Hopper: Yes
- Easy Clean Hopper: Yes
- Hopper Volume: 50 Liters
- Contact Materials: SUS 304
- Machine Weight: 650 Kg
- Power: 3P 380V 2.0Kw
- Dimensions: 200*150*222cm
