

HSC-680A Plastic Thermoforming Machine

It is suitable to from PP, PS, HIPS, PVC, PET plastic sheets, which can be widely used to produce all kinds of plastic boxes, containers and other plastic wares, such as ice-cream, milk cups chocolate package boxes, candy boxes and fast-food boxes etc.

Technical Parameter:

Max forming area	280×680mm
Max forming depth	120mm
Max width range of sheet	820mm
Thickness range of sheet	0.3-2.0mm
Max sheet roller diameter	1200mm
Air pressure	0.7MPa
Air consumption	3000 (Liters/h)
Water consumption	3000L/min
Heating motor power	70KW
Main motor power	10KW
Pre-drawing motor power	5KW
Feeding motor power	5KW
Rewinding power	0.55KW
Max speed	35 (cycles/min)
Power (three phase)	380V±15V/50/60HZ
