

Liquid Automatic Packing Machine LQ-4R

Feature

- It is applicable for mass-produced extract products.
- It is available without I-Mark.
- C.I.P can be done with supply unit only.
- Each unit has been installed with the safety cover and the alarming device.
- Each part has been standardized and simplified to reduce time taken for replacements. Better yet, the machine rarely generates replacement parts.
- The position calibration for the secondary sealing and for the cutter is done automatically.
- A flashing light is turned on 2 minutes before the film is finished. When the films are completely consumed, the machine will stop at its designated position.

Contents
