

Tray Sealer Machine-(Touch Screen) 1 Tray CE-120/FHJ

This machine is a new desktop automatic sealing machine developed according to market demand, which improves production efficiency and saves effort. The sealing film is made of plastic composite coils, automatic punching, automatic sealing and automatic waste discharge, which solves some cups without lids. , The sealing problem of the box, no matter what shape, it can be sealed, which saves space, and can seal a box at a time, which is very popular among users.

Specification:

1. Manually put the box, automatically send the box, air pressure sealing, automatic waste discharge, automatic out of the box.
2. Single-chip microcomputer program control, stable and reliable.
3. The man-machine interface is controlled by a touch screen, which is easy to operate and can monitor the running status of the machine at any time.
4. Classic digital display temperature control meter, the temperature difference is plus or minus 5 degrees, and the sealing effect is good.
5. Precise guide rail, smooth walking and precise positioning.
6. Taiwan photoelectric eye tracking.

Technical Parameter:

Model	CE-120/FHJ
Production Speed	400-500 boxes/hour
Sealing Diameter	30-250mm can be customized
Sealing Material	Plastic Composite film, aluminum foil composite film, PP, PE, PET, PS are all available
The Size of the Sealing Film	2-3mm larger than the cup mouth, with tight sealing and beautiful appearance
Temperature Range	0-300 degrees
Power	800-1200W
Voltage	220V
Machine Size	550 x 700 x 850
Machine Appearance	Stainless steel
Net Weight	90kg
