

TQC-750 Disposable Plastic Plate Cup Thermoforming Machine

The automatic disposable plastic plate making machine is professionally called plastic thermoforming machine. This equipment is a collection of thermoforming cutting waste recycling equipment, the equipment does not have punching Holes, but can be opened by in-die punching. The equipment is equipped with air compressors, air storage tanks, and chillers. These auxiliary equipment help the production efficiency of the equipment to increase to 30 times per minute.

Technical Parameters:

Model	TQC-750	TQC-650B
Max. Forming Area	750*480mm	650*320mm
Max. Forming Depth	125-180mm (custom height)	
Sheet Thickness	0.3-1.8mm	
Sheet Width	760mm	650mm
Max. Forming Speed	30 times/min	
Air Pressure	0.6-0.8mpa	
Air Consumption	3.0m ³ /min	2.0m ³ /min
Water Consumption	0.7m ³ /h	0.5m ³ /h
Rated Power	140Kw	98Kw
Used Power	98Kw	72Kw
Power Supply	AC 380V,50Hz, Three-phase, Four-wire	
Dimension	L8500*W2200*H3200mm	L7000*W2000*H3100mm
Weight	About 6.5T	About 5T
